

Microfiber Autoscrubber Pads

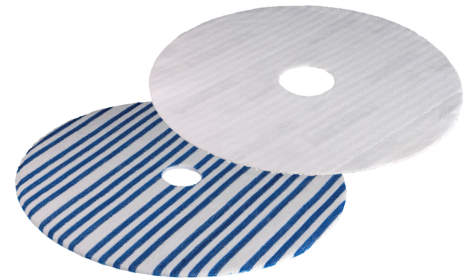

Premium Cleaning Solutions for LVT and All Hard Surface Flooring

Contec Professional's Autoscrubber Pad line is a holistic floor care solution for LVT, VCT, rubber, Terrazzo, poured flooring and other hard surface floors. Paired with our patented connector pads, these autoscrubber pads are suitable for use with a wide variety of autoscrubber machines from all major manufacturers.

The Premira Microfiber Autoscrubber Pads, crafted from our premium **Premira® Disposable Microfiber**, deliver exceptional dirt and debris removal, even on textured surfaces, for a pristine clean. Designed for single-shift use, these daily maintenance pads simplify logistics and increase productivity by offering a single cleaning pad for all of your hard surface flooring.

For high traffic or higher soil load areas, we recommend our **Durham AutoScrubber Pad**. Non-abrasive scrub strips, gently clean your hard surface floor without scratching floor surfaces or finishes.

The autoscrubber pads should be used with Contec's patented Connector Pad, which attaches to the pad driver of the autoscrubber. The connector pad provides solid attachment to the pad driver, but also allows the microfiber pad to be easily and securely attached and removed from it.

Contec's comprehensive range of Autoscrubber Pads, including options for daily maintenance and high-traffic areas, ensures superior cleaning performance and convenience for all facility needs

Features

Superior Cleaning Performance: Contec Premira Microfiber Autoscrubber Pads clean better than abrasive pads. Our microfiber reaches down into LVT embossing and lifts dirt out – traditional abrasive pads do not.

Safer for Flooring: Our Autoscrubber Pads will not abrade LVT flooring as some traditional abrasive pads do.

Holistic Solution for hard surface flooring: Contec pads will work effectively on any hard surface flooring.

Improved Aesthetics: Contec's Autoscrubber Pads will not scratch or polish LVT, allowing the floor to retain its original sheen, as opposed to abrasive pads that create areas of varying sheen.

Smaller storage footprint: Our Autoscrubber Pads take up less space in the storage closet than a full portfolio of abrasive pads.
