

C+™ Probiotic Biosurfactant Cleaner

Probiotic cleaner for ongoing surface cleanliness and odor control

C+™ Probiotic Biosurfactant Cleaner is a concentrated, pH-neutral cleaner formulated to provide effective daily cleaning while supporting ongoing surface cleanliness through probiotic technology. Unlike traditional cleaners that stop working once surfaces dry, C+ introduces beneficial probiotics that continue breaking down residual organic matter between routine cleaning cycles. The formula is suitable for routine cleaning in non-critical areas where maintaining clean, fresh surfaces is a priority. C+ helps reduce persistent odors associated with organic soils, and can be incorporated into existing cleaning protocols with standard application equipment. Manufacturer literature states the product is designed to support continued cleaning activity after application.

C+ uses beneficial probiotics to break down residual organic matter that conventional cleaners may leave behind. The ongoing microbial activity helps support cleaner surfaces and odor control between scheduled cleaning cycles, making it well suited for routine maintenance in non-critical facility areas. Manufacturer claims should be used in accordance with the product labeling.

Features

Supports ongoing cleaning between routine applications

pH-neutral, non-corrosive formulation

Helps reduce odor-causing organic residues

Residue-free finish on treated surfaces

Part No.	Description	Size	Packaging
11193	C+ Probiotic Biosurfactant Cleaner	1 gallon	4/case
11195	C+ Probiotic Biosurfactant Cleaner	5 gallon pail	1/case
11197	C+ Probiotic Biosurfactant Cleaner	55 gallon	1/case
