

CO+™ Organic Probiotic Biosurfactant Degreaser & Cleaner

Heavy-duty probiotic cleaner for grease, organic soils, and ongoing surface cleanliness

CO+™ Organic Probiotic Biosurfactant Degreaser & Cleaner is a concentrated, pH-neutral cleaner designed to remove heavy organic soils while continuing to clean beyond the initial application. Unlike conventional degreasers that stop working once surfaces are rinsed, CO+ combines biosurfactant technology with beneficial probiotics that continue breaking down residual organic matter after routine cleaning. The chemistry is suitable for moisture-tolerant surfaces and helps leave treated surfaces clean. CO+ is well suited for environmental services teams managing high-soil areas such as loading docks, waste holding rooms, service corridors, utility spaces, environmental services workrooms, and other areas where grease and organic buildup can make cleaning more difficult. By combining immediate cleaning with ongoing probiotic activity, CO+ supports more efficient maintenance between routine cleaning cycles. Product performance and probiotic claims are based on manufacturer literature.

CO+ combines biosurfactants with beneficial probiotics to remove heavy organic soils while continuing to break down residual buildup after cleaning. This ongoing activity helps maintain cleaner surfaces in high-soil environments between scheduled cleaning cycles. Manufacturer claims should be used in accordance with product labeling.

Features

Removes grease and heavy organic soils

Continues cleaning after application

pH-neutral, non-corrosive formulation

Leaves surfaces clean and residue-free

Part No.	Description	Size	Packaging
11207	CO+ Probiotic Biosurfactant Degreaser & Cleaner	1 gallon	4/case
11209	CO+ Probiotic Biosurfactant Degreaser & Cleaner	5 gallon pail	1/case
11211	CO+ Probiotic Biosurfactant Degreaser & Cleaner	55 gallon drum	1/case
